

## **Levanta Renewables Inspires Young Solar Heroes in Thailand**

**Bangkok, Thailand — 14 September 2026** — Southeast Asian renewable energy platform, Levanta Renewables, recently hosted “Nak Pithak Palang-ngan Sa-at Tua Noi” (Young Solar Heroes) at Wat Mai Charoen Rad School in Bangkok, bringing together 56 students and 10 teachers for a day of learning about renewable energy, responsible waste management and wildfire prevention through fun, games and interactive activities. As part of the initiative, the company also contributed school supplies to support the students’ learning and foster a more conducive educational environment.

The Levanta Renewables team in Thailand helped coordinate and facilitate the programme, engaging with the students throughout the activities.

“The energy transition will shape the future of the communities we operate in. We see value in introducing young people to renewable energy early and giving them a better understanding of how clean energy and environmental responsibility are connected. Young Solar Hero is one way we can help make that connection. By inspiring young minds to embrace sustainability, we hope these students will become champions of positive change and advocates for sustainable behaviours within their families and local community.”

— **Chayasak Ittisiri**, Country Manager Thailand, Levanta Renewables

“Our students really enjoyed the Young Solar Hero programme, particularly the hands-on activities and opportunities to exchange ideas. Beyond learning about renewable energy, the activities encouraged them to think critically, work as a team and learn from one another. We appreciate the opportunity to expose our students to these topics in an engaging way and hope they can bring some of what they learned into their daily lives.”

— **Atthapakorn Sirikul**, Principal of Wat Mai Charoen Rad School

The initiative was delivered through Levanta CARES, Levanta Renewables community investment programme. It reflects the company’s commitment to building meaningful relationships with communities and creating lasting value alongside its renewable energy projects, while encouraging the next generation to learn about renewable energy, care for the environment and play a role in a more sustainable future.

**About Levanta Renewables**

Levanta Renewables is an institutionally backed renewable energy platform focused on Southeast Asia, developing, building and operating utility-scale solar, wind, and energy storage projects.

Headquartered in Singapore, Levanta has integrated capabilities from greenfield development to financing, construction, and long-term asset management, with a focus on disciplined execution in complex, high-growth markets.

The company is currently building a gigawatt-scale renewable energy portfolio across Thailand, the Philippines, Vietnam and Malaysia, while expanding its presence across key regional markets and delivering sustainable, long-term value for stakeholders.

Levanta Renewables is wholly owned by Actis, a leading global sustainable infrastructure investor and part of General Atlantic's global investment platform, with approximately US\$130 billion in combined assets under management.
