Levanta Renewables Secures 166 MWp Solar Power Project in the Philippines

SINGAPORE, 14 OCTOBER 2025 - Levanta Renewables — Southeast Asia's leading renewable energy platform backed by Actis, a global investor in sustainable infrastructure across growth markets — has secured the development of a solar and storage project in the Visayas under the Philippines' Fourth Green Energy Auction (GEA-4).

Spanning approximately 155 hectares, the project will feature a 166 MWp ground-mounted solar farm integrated with a Battery Energy Storage System (BESS). With a planned capacity of 175 MWAC and an estimated average capacity factor of 43%, it represents a major capital investment aimed at accelerating the Philippines' clean energy transition. The total investment outlay is estimated at approximately PHP 5 billion.

Once operational, the project is expected to reduce the country's reliance on imported fossil fuels and avoid over 200,000 tons of CO_2 emissions annually. Additionally, the project will provide direct benefits to host communities through ER 1-94 programs, generate tax revenues, create direct and indirect employment opportunities, and support regional economic growth through long-term community development and social responsibility initiatives.

Pramod Singh, Chief Executive Officer of Levanta Renewables, commented, *"Securing the solar and storage power project in the Visayas is a major milestone for Levanta as we scale our presence in the Philippines. This project underscores our commitment to enabling Southeast Asia's energy transition through high-impact partnerships and commercially viable clean energy solutions."*

Pankaj Sakhuja, Chief Investment Officer of Levanta Renewables, added, *"This investment reflects our strategy to deliver bankable, utility-scale renewable projects with strong long-term fundamentals. The integration of battery storage enhances the project's value, while contributing to the country's broader decarbonisation and energy security goals."*

Ravi Chandran, Head, Philippines Task Force at Levanta Renewables, stated, *"The successful securing of this project is the result of strong coordination with our partners, government agencies, and local stakeholders. We are focused on delivering this project to the highest standards while creating tangible benefits for the community and the broader region."*

The project is poised to support the Philippines' national target of securing a 35% renewable energy share by 2030 and contribute to the build-up of additional clean energy capacity over the next six years.

About Levanta Renewables

Levanta Renewables is a leading renewable energy platform in Southeast Asia, led by a professional team with a proven track record of delivering high-quality projects. Committed to providing innovative solar and wind solutions, Levanta is headquartered in Singapore and operates across Thailand, Malaysia, the Philippines and Vietnam.

Levanta Renewables oversees all stages of its projects, from development and financing to construction, operations, and maintenance. As Actis's renewable energy platform in Southeast Asia, Levanta Renewables is targeting to achieve an operating capacity of 1.5 GW by 2028, reinforcing its dedication to sustainability and clean energy advancement in the region.
